Word 2000 Quick Guide

To open Word:

1. Move the mouse pointer over the Word 2000 icon.
2. Double click with the left mouse button, or click once, then press enter.

To enter text

1. Begin typing at the blinking cursor.
2. To move down on the page, press Enter key on the keyboard.

To delete text

1. Move the cursor to the text you want to delete.
2. Press the DELETE key to remove text to the right of the cursor.
3. Press the BACKSPACE key to remove text to the left of the cursor.

To print

1. Click **Print** button on the tool bar.

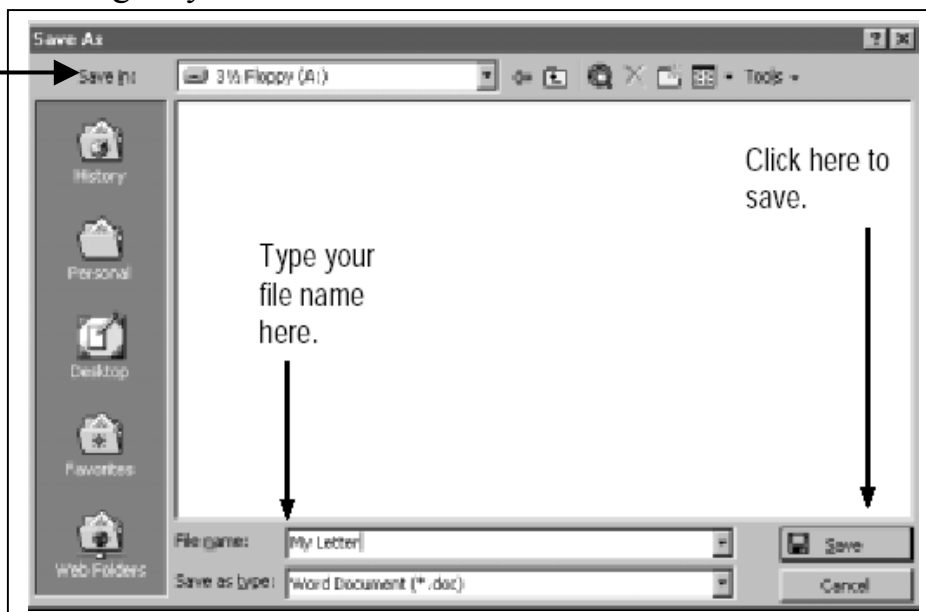

To save a document for the first time.

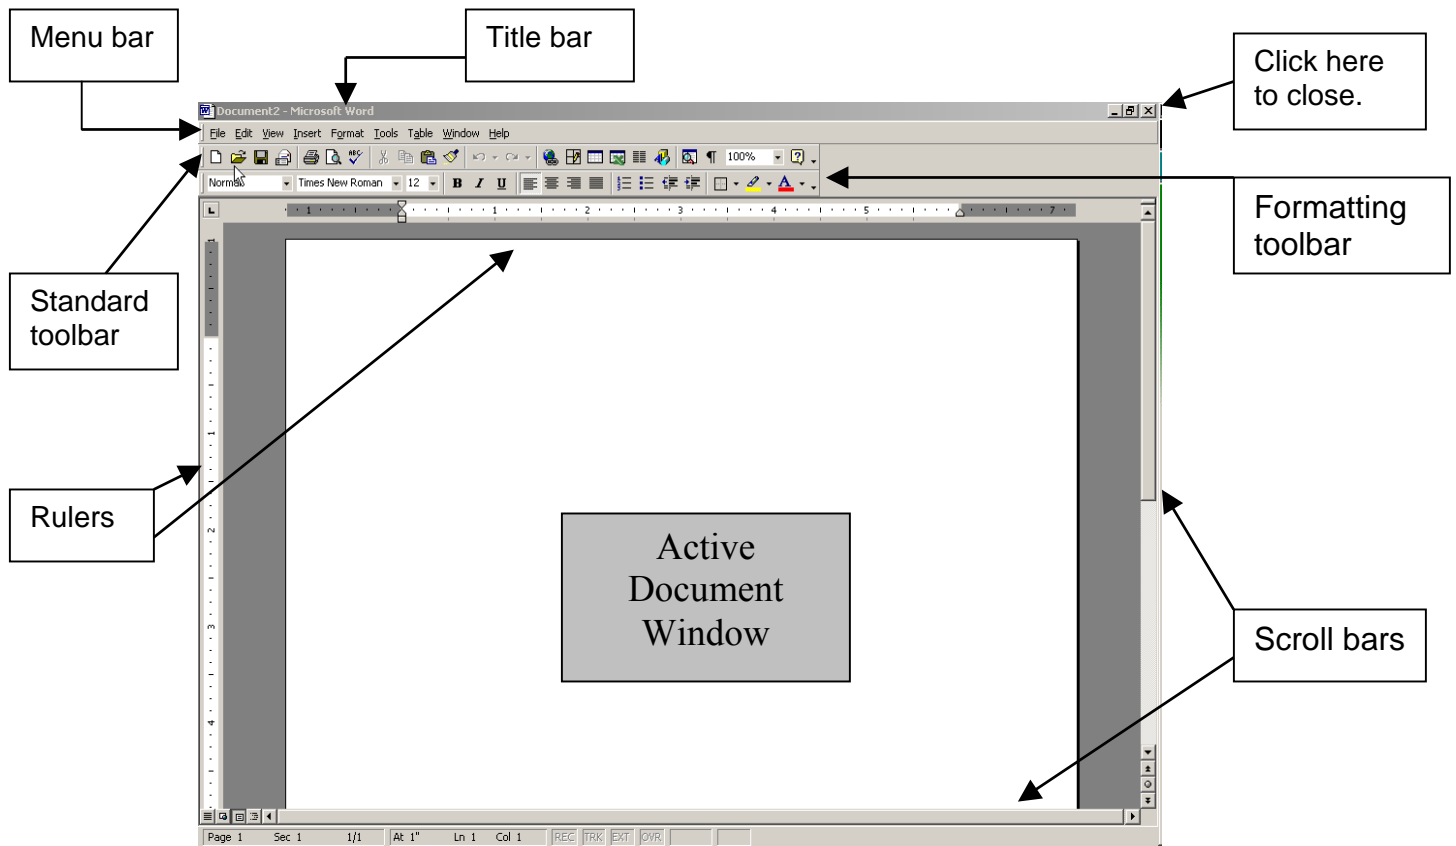

1. Click the **Save** button on the tool bar. The **Save As** dialog box will appear.
2. Click the arrow to the right of the **Save In** list box.
3. Click **3 ½ Floppy A:** on the drop down list.
4. Click inside the **File Name** text box.
5. Enter the name you want to give your document.
6. Click **Save**.

Choose the drive to save in here.

The Word Window

Word 2000 normally displays its toolbars side-by-side rather than on top of one another. Some of the toolbar buttons are hidden even if the application window is maximized.

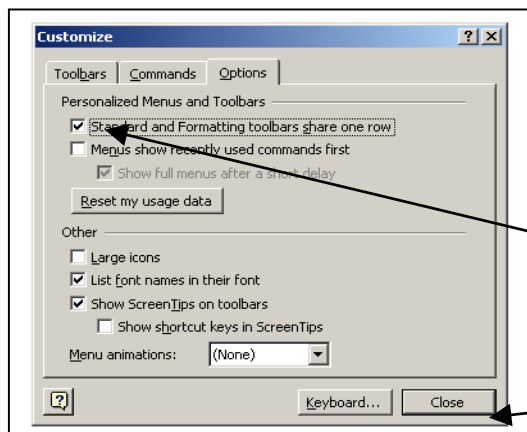

1. To display these hidden buttons, click the **More Buttons** button.

Hidden toolbar buttons are displayed on dropdown menus.

2. Or, to add a row of the hidden buttons so they are always on view for you to use:

- a. Click the **Tools** menu button and pull the pointer down the list and click on the **Customize** menu item.
- b. In the **Customize** dialog box, click on the **Options** tab and click on the checkmark in the first check box to turn off "Standard and formatting toolbars share one row."
- c. Click the **Close** button at the bottom of the box.

Party Invitation

Follow the directions below to create an invitation. It is recommended that you read through each individual direction before performing it.

Remember that text is entered (typed in) or pasted wherever the insertion point is blinking. Always make sure the insertion point is where you want the text to be entered. To move the location of the insertion point, move the mouse and click.

Remember, too, that there is usually more than one way to accomplish tasks. If a different way to do something occurs to you, go ahead and try it! If it doesn't work, you can always click the Undo button.

If you can't remember what a button does, move the mouse cursor over it and pause. A yellow ToolTip will appear describing the button's function.

In the instructions, the following terms will be used:

Click—single left mouse click

Button—on screen in the toolbar

Key—on the keyboard

TEXT ENTRY

1. Open Word (double click the Word icon on the desktop), if it is not already open.

If Word is already open, single-click the **New Document** button in the upper left corner of the standard toolbar (pictured below):

(This will give you a clean “sheet of paper.”)

2. On the **Formatting** toolbar, change the **font size** to 18. (Click the downward-pointing arrow to the right of the 10, and select 18 from the drop-down menu.)

3. Press the **ENTER** key five times.

5. Select the first mention of **Steve and Jane Mann** by moving the mouse pointer to the left side of the screen until it becomes a right-pointing arrow and click.
6. Select **font style** Lucida console.
7. Click away from the phrase Steve and Jane Mann to deselect it.

8. Scroll down to 5:00–9:00 PM. Click to the right of PM, and drag to the top of the document, selecting everything from Invitation to 5:00-9:00 PM.
9. On the **Formatting** toolbar, click the **Center** Alignment button.
10. Click away from the selected text to deselect it.
11. Select everything from Address: through (Regrets only) by following the same process as in Step 7. Choose **font size** 14.
12. Click away from the selected text to deselect it.
13. Scroll to the middle section of the document. Move the mouse pointer to just before the word **and** in the phrase **and we are having a party to celebrate**. Click so the insertion point appears there. Press the **ENTER** key.

FINALIZING AND SAVING

1. Click the **Print Preview** button on the standard toolbar.
2. Does the document look as you intended it? If it does, click the **Close** button and
3. proceed to save the document (see below). If not, click the **Close** button and see if you can make the necessary changes. Ask your instructor for assistance if you need help.
4. To save the document, insert a floppy disk into the drive.
5. On the **File** menu, select **Save As**.
6. If 3 1/2 " Floppy [A:] does not appear in the **Save in** Box, click the downward-pointing arrow to the right of the **Save in** Box. Select 3 1/2 " Floppy [A:] from the list.
7. The **File Name** Box will say **Invitation**.
8. Click the **Save** button.
9. Your work is now saved. Close the Word program by clicking the Close (**X**) button in the upper right corner of the screen.
10. Please give your feedback on the usefulness of this exercise to the instructors.

Introduction to Word - Tips

1. Typing takes place at the Insertion Point (flashing line), NOT at the cursor.
2. Click once to locate the Insertion Point where you want it. Note that the Insertion Point can live only within existing text. You can also move the Insertion Point within text using the **← → ↑ ↓** keys.
3. Use the **Enter** key to end a paragraph and drop down to the next line. Allow long sentences to automatically word-wrap down to the next line.
4. To view up and down the document, use the **Scroll Bars** and **Arrows** at the right edge of the window, or rotate the **Mouse Wheel**.
5. The **Backspace** key deletes to the Left of the Insertion Point. The **Delete** key deletes to the Right of the Insertion Point.
6. Use **Edit → Undo** to remove your last action.
7. Selecting:
 - Drag over text while holding down left mouse button to select several words at once. Note that you can drag the mouse up or down to select other lines.
 - Double-click within a word to select the entire word.
 - Move cursor into left margin until it turns into an arrow pointing up and to the right, and then click to select entire line. You can drag up or down to select several lines at once.
 - To select a LONG area of text, first select a little bit at one end. Then hold down the **Shift** key while you click at the other end.
 - Select ALL the text with **CTRL + A**, or menu items **Edit → Select All**.
 - To Unselect an area, just click once anywhere in the document.
8. If you have an area selected, then your next action will act only upon the selected area. If you type something, the new typing will replace the selected text.
9. To show all toolbar items, use **Tools → Customize** and uncheck the box for “Standard and Formatting toolbars share one row” then click on Close.
10. To show Invisible characters, click on the **Show/Hide ¶** toolbar icon.
11. Use **File → Save** to update an existing file with the same name and in the same location. Use **File → Save As** to create a NEW file with a different name and/or a different location.
12. Every page has a blank area of Margin at the Top, Bottom, and Sides. Adjust the Margins using **File → Page Setup**.
